Project Title: Preserving Lost and Traditional Recipes of Jammu

Technology Stack: Laravel (Backend + Frontend Framework)

Objective

Develop a dynamic, user-friendly website to preserve and showcase traditional and lost recipes from Jammu, allowing users to explore, learn, and submit recipes.

Website Structure

1. Home Page

- **Purpose:** Display recipes in a blog-style tile layout.
- **Features:**
 - Recipe cards displaying:
 - Recipe name
 - Thumbnail image
 - Short description
 - Pagination or infinite scroll (optional)
 - Clickable cards redirecting to detailed recipe pages
- **Design Notes:**
 - Responsive grid or masonry layout
 - Optionally highlight featured recipes

2. Recipe Detail Page

- **Purpose:** Provide complete information about each recipe.
- **Sections:**
 - Title
 - History (background and significance)
 - Origin (regional or cultural origin)

- Geographical Presence (areas where the dish is or was popular)
- Process (step-by-step preparation guide)
- Image Gallery (multiple images)
- **Features:**
 - Responsive design
 - SEO-friendly URLs

3. Contact Us Page

- **Purpose:** Allow visitors to communicate with the website team.
- **Fields:**
 - Name (required)
 - Email (required)
 - Subject (optional)
 - Message (required)
- **Features:**
 - Frontend and backend form validation
 - Auto-notification email to admin
 - CAPTCHA

4. Post Your Recipe Page

- **Purpose:** Facilitate users to submit their own traditional recipes.
 - **Form Fields:**
 - Recipe Title (required)
 - Short Description (required)
 - History (optional)
 - Origin (optional)
 - Geographical Presence (optional)
 - Full Process/Instructions (required)
 - Upload Images (multiple, optional)
 - Submitter's Name (optional)
 - Submitter's Email Address (optional)
 - Captcha
 - **Features:**
 - Form validation
 - Admin moderation before publishing
 - Success confirmation after submission
 - Image file size and format validation
-

Admin Panel Requirements

- Manage submitted recipes (view, approve, edit, delete)
 - View and manage contact form inquiries
-

Technical Requirements

- **Backend:** Laravel 10+
 - **Database:** MySQL
 - **Frontend:** Blade templating engine, TailwindCSS or Bootstrap
 - **Authentication:** Admin login for content management (optional)
 - **Security:**
 - CSRF protection
 - Input validation
 - Secure file upload handling
 - **Optimization:**
 - Image optimization
 - SEO meta-tagging for recipes
 - Responsive mobile-first
-
